

PLANT ELECTRICIAN Position

Blue Earth Light and Water (BELW) located in the city of Blue Earth, Minnesota. BELW is a nationally recognized municipal utility winning the RP3 Diamond award from the American Public Power Association. We are now accepting applications for the position of Plant Electrician. This position will be vital in the day-to-day operation and maintenance of BELW's 9MW diesel generation power plant. This position will be responsible for installing, testing, troubleshooting, and maintaining water and electric revenue meters and related service equipment to ensure that they are operating accurately. Additional assignments include single-phase and poly-phase electric metering as well as troubleshooting load management equipment and power quality investigations. Other responsibilities include coordinating/working with other departments to ensure that the daily functions of meter reading and service disconnects/reconnects are performed in a timely manner. This position will also be "on call" one week a month monitoring the BELW municipal water system.

Please note:

Applicants advancing in the selection process will be provided with extra time to complete a written, job-related skills assessment, and a personality assessment.

Applications will be accepted until the vacancy is filled with priority consideration for applications received by May 31, 2021.

Minimum qualifications include

A high school diploma or equivalent GED and completion of an approved Meter Technician training program including associated exam.

OR *A high school diploma or equivalent G.E.D. and completion of a two-year electrical/water trade school program and the ability to be a registered and licensed electrician within 18 months.

Preferably: An associate degree within the academic concentration of Energy Technician specialist. Able to demonstrate experience in understanding electrical prints, ability to troubleshoot automation systems, PLC programming relays and general wiring skills.

Licenses and Certifications

Valid driver's license

Applications can be found on our website at www.BELW.org

Applications and Resumes can be sent to Blue Earth Light and Water by May 31, 2021
